

The power of staying the course and a diversified investment approach

Financial year total returns (%) for the major asset classes for financial years ending between 1991 and 2020.

The diagram below shows the performance of various asset classes over the past 30 years ranked from worst (bottom) to best (top) for each year. When deciding where to invest their money, it is important investors understand that the best and worst performing asset classes will often vary from one year to the next. Having a diversified mix of investments across multiple asset classes can help smooth out returns over time.

The diagram also reinforces the importance of sticking to an investment strategy and focusing on the long term.
